FIRE HYDRANT METER RENTAL PROCEDURES

- Bartow County employees will install, pick up, and move hydrant meters. If a meter needs to be moved a \$25.00 service fee will be applied to the next bill.
- **DO NOT** remove the hydrant meter from the fire hydrant.
- During colder months, the renter is responsible for insulating the hydrant meter. If there is meter damage from failure to insulate, the renter will forfeit their deposit and a new deposit will have to be applied to the account before another meter is installed.
- Operation of the hydrant meter shall only be performed using the gate or ball valve on the meter. Operation of the hydrant or any associated valves within the Bartow County system is strictly prohibited. If unauthorized system operation occurs, additional fines and repair costs may be incurred. If operated with hydrant operating nut, a hydrant rebuild kit plus labor cost will be applied to account.
- If the hydrant meter has been modified in any way or the hose adaptor that's provided has been removed to install a quick connect a fee will be applied to get the hydrant meter back to original condition.
- Any damages to the hydrant meter will result in forfeiture of deposit.
- Any repairs to the area, including but not limited to, ruts from the water truck will need to be made by the company before the deposit is returned.
- One hydrant meter rental per company or project unless otherwise authorized by Bartow County Water Department.
- Fire hydrant meters will only be issued out for a max of 1 year, unless otherwise authorized by the Bartow County Water Department. If needed for longer it is suggested to utilize the City of Cartersville's filling station.
- Any violation of the above-mentioned shall result in further consequences up to and including tamper fees, additional fines, loss of use of hydrant meter, or issuance of a stop work order.
